1. The following list, [redacted], shows the amounts of various raw materials needed per day to keep the blast furnaces at Eisenhuetten Kombinat Stalinstadt (EKS) in operation during the fourth quarter of 1953. All amounts are in metric tons.

|                            |       |
|----------------------------|-------|
| Russian ore                | 1,216 |
| Buechenberg ore            | 112   |
| Braune-Sumpf ore           | 1,020 |
| Schmalkalden ore           | 381   |
| Polish coke                | 2,880 |
| Roasted sulphur ore        | 850   |
| Lime                       | 1,565 |
| Roll sinter (Walzensinter) | 38    |
| Lignite slag               | 81.5  |
| Scrap metal                | 124   |
| Coal                       | 200   |

2. The following amounts of various raw materials will be needed each day to keep in operation blast furnaces at EKS during 1954. All amounts are in metric tons.

|                            |       |
|----------------------------|-------|
| Russian ore                | 2,300 |
| Buechenberg ore            | 96    |
| Braune-Sumpf ore           | 822   |
| Schmalkalden ore           | 241   |
| Polish coke                | 3,430 |
| Roasted sulphur ore        | 873   |
| Lime                       | 1,942 |
| Roll sinter (Walzensinter) | 63    |
| Lignite slag               | 342   |
| Scrap metal                | 137   |
| Coal                       | 200   |
